

**NEW
ITEMS!**

NEW BrewRite™ Kettles NOW Available!

Heavy duty Stainless Steel BrewRite™ Brew Kettles feature a 1/4" thick tri-clad bonded, bottom featuring an aluminum core sandwiched between two layers of stainless steel. The aluminum core allows for even heat distribution while the commercial food grade stainless steel is the only metal in contact with the wort. Even heat distribution eliminates hot spots, which helps prevent scorching of your malt and makes cleanup a breeze. The thick, padded bottom makes these kettles induction, gas, electric and ceramic ready. These BrewRite™ kettles also feature a heavy duty recessed stainless steel lid and strong, welded, hollow loop side handles. Packed one per carton with lid.

Item#	Capacity	Dimensions	Weight	Prix
